COMMUNITY

Conducted Webpack workshops on behalf of Zalora Engineering team: Women Who Code (Singapore), Women Who Code (Kuala Lumpur), She Codes (Ho Chi Minh)

EXPERIENCE

FEB 2020 – PRESENT | SILOT.AI | SINGAPORE

UX Designer

- Researching and identifying problems through stakeholder talks and user research in Indonesia MSME market for upcoming products.
- Developing and creating customer journey maps, user flows, and wireframes to effectively communicate user interactions and workflow designs.
- Designing the UI/UX for settlement experience of the QR payment aggregator mobile app.

MAR 2018 – OCT 2019 | ZALORA | SINGAPORE

UX Engineer

- Co-worked with designers and product managers for Zalora's new design system to deliver consistent user experience on all web products. My main contributions were:
 - Led the CSS and React component libraries development.
 - Contributed to the design guidelines, library documentation
 - Revamped the mobile website by applying the component library.
- Supported engineers in best practices for UI/UX design.
- Analyzed and propose solutions to PMs for tradeoff decisions between cost, schedule, and customer benefit on proposed UI/UX design options.
- Refactored and modularised legacy frontend codebase with Webpack and Babel for the desktop and mobile website.

OCT 2016 – FEB 2018 | WORKS APPLICATIONS | SINGAPORE

R&D Engineer & UX Designer

- Awarded as Star Performer
- Collaborated with stakeholders to define product requirements and road map
- Developed and designed wireframe, storyboards, user flows, and hi-fi prototypes.
- Create product requirements specifications for product management and implementation.

JAN 2015 – JUN 2015 | AUTODESK | SINGAPORE

UX Designer Intern

- Designed the visual and implemented the interactive prototypes for Autodesk Desktop App.
