Experience

ZALORA
Software Engineer   Mar 2018 - Oct 2019
- Co-work with designers and product managers for Zalora's new design system to deliver consistent user experience on all web products. My main contributions were:
  - Led the CSS and React component libraries development.
  - The main contributor to the portal including design guidelines, library documentation and online playground.
  - Revamped the mobile website by applying the component library.

- Refactored and modularise legacy frontend codebase with Webpack and Babel for the desktop and mobile website.
- Developed features for business requirements related to the product catalog, product detail, checkout process, and marketing.

Works Applications
R&D Engineer   Oct 2016 - Feb 2018
- Awarded as Star Performer for achieving breakthrough improvement in HUE Mail(an enterprise email system) security functions. My main contributions were:
  - Collaborated with product owner and sales team to define product requirements and road map.
  - Responsible for user flows, interaction, and visual design, prototyping, user testing, and design specification documentation.
- Developed the key features e.g. Approval Flow, Contact and resolve 100+ bugs in HUE Mail.

Autodesk
UX Design Intern   Jan 2015 - Jun 2015
- Designed and developed an internal peer evaluation system using MEAN stack.
- Conducted competitive analysis for AutoCAD block library.
- Developed interactive prototypes for Autodesk Application Manager.

Community

Conducted Webpack workshops on behalf of Zalora Engineering team in:Women Who Code (Singapore), Women Who Code (Kuala Lumpur), She Codes (Ho Chi Minh)
